

PVC insulated, PVC sheathed, telephone cable

Application:

- For telephone signal transmission lines and controlled connecting lines of computers, controlling low voltage equipment and instruments.

Standard:

-IEC 189
-VDE 0815

Construction:

- Solid plain or tinned annealed copper conductor.
- Bare copper conductor (optional).
- PVC insulation, type TI 1.
- PVC sheath type TM 1.

General specification:

- Working temperature: Max. 70°C.
- code designation: JYY.

Number of pairs	Conductor diameter	Insulation thickness	Sheath thickness	Mean overall diameter	Weight Approx.
	mm	mm	mm	mm	kg/km
